

# VERSATOR<sup>®</sup>

TISSUE MORCELLATION SYSTEM

# + MORSAFE<sup>®</sup>

TISSUE MORCELLATION BAG

## CONTAINED TISSUE EXTRACTION SYSTEM

*More Than*  
**1100 Installations Worldwide**  
**50000 Procedures Using Versator & MorSafe**

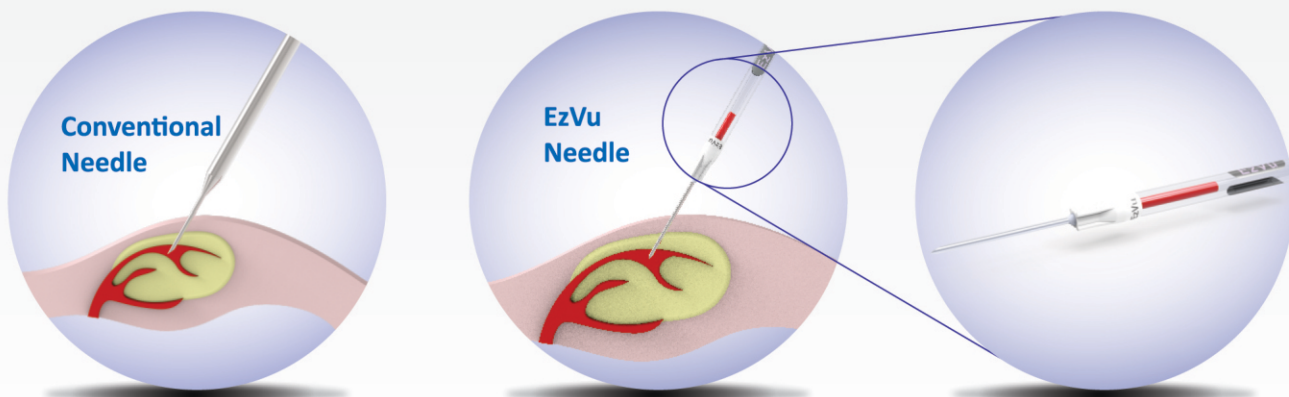

The Versator Tissue Morcellation System is an effective solution for tissue extraction during laparoscopic interventions including myomectomies and hysterectomies.

**JONATHAN DANIELS : Phone : 9994998060, 9578886222. Email : moriahhealthservices@yahoo.in**

## Visual Vasopressor Injector

*A Patented Design by Dr.Sanket Pisat*

During laparoscopic myomectomy and hysterectomy, EzVu Visual Vasopressor Injector helps to detect early inadvertent vascular puncture, even in a small calibre blood vessel, and with more sensitivity than a conventional opaque needle.

## EZCATCH®

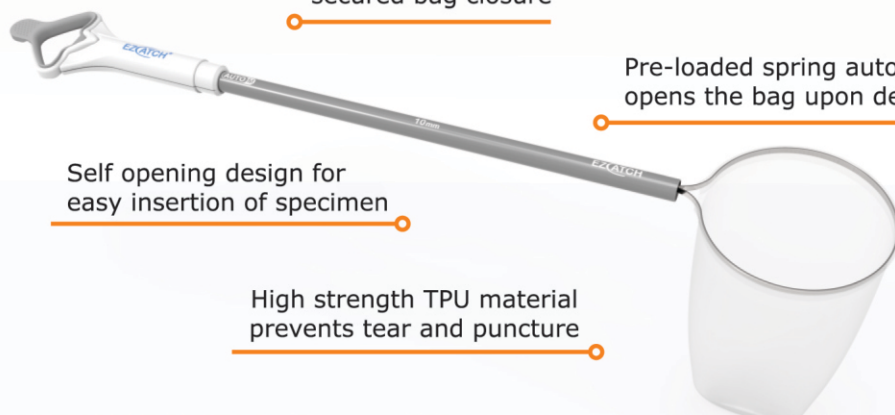

*Reliable, Durable,  
Convenient Laparoscopic  
Tissue Retrieval System*

## Tissue Retrieval Bag

EzCatch® YR

EzCatch® TR

EzCatch® AUTO

Pull handle grip for secured bag closure

Pre-loaded spring automatically opens the bag upon deployment

Self opening design for easy insertion of specimen

High strength TPU material prevents tear and puncture

Flexible metal ring supports wider opening
